WHAT WE DO

Biamp® is a leading provider of innovative, networked media solutions that connect people through extraordinary audiovisual experiences. For more than 50 years, we've developed professional AV solutions that enable great communication for spaces ranging from small rooms to large public venues. The company is recognized worldwide for delivering high quality products and backing them with a commitment to exceptional customer service.

SOLUTION OFFERINGS

Conferencing

Biamp conferencing solutions provide seamless audiovisual experiences for meeting spaces of all sizes. Bring-your-own-meeting (BYOM) support lets users connect their laptops to the room's AV system and run meetings on whichever conferencing platform they prefer. Wireless collaboration tools make it easy for participants to share content via the room display from their own devices, with no cables or adapters needed.

Installed Sound

Every space has its own unique acoustic needs, which is why we provide a wide range of solutions, including loudspeakers and amplifiers, to serve conference rooms, stadiums, retail spaces, and all venue types in between.

Control

Biamp control solutions provide the right interface for all integrated AV hardware. We deliver easily configurable control products that offer simple, reliable connections for every meeting, lecture, and presentation.

Audio and Video Distribution

Our audio and video solutions deliver clear communication and real-time content sharing across larger spaces such as classrooms, auditoriums, and multi-purpose rooms. Sound reinforcement systems provide audio distribution and voice amplification, while our video encoders and decoders stream video over the network with low latency and exceptional image quality.

Networked Paging and Voice Evacuation

Our paging platform is a highly reliable solution that manages paging, background music, and emergency communication. Powerful, scalable, and flexible, it can meet the needs of any facility now and well into the future.

Sound Masking and Speech Privacy

Our sound masking products eliminate noise distractions and help improve speech privacy, significant issues that directly affect employees' job satisfaction and productivity.

Room & Desk Booking

Evoko room and desk scheduling systems take workplace management to a new level of simplicity.

OUR PRODUCT FAMILIES

- **Tesira:** Our flagship platform, Tesira is the world's premier integrated, networked audio and video processing and distribution platform.
- **Devio:** From huddle rooms to large conference spaces, Devio brings full conference room audio and video to every meeting space, including Devio UCX, our Android-based UC compute platform for Microsoft Teams Rooms and Zoom Rooms.
- **Parlé:** Our family of dynamic Beamtracking microphones deliver superior audio experiences via 360° voice tracking that enables complete room coverage. Parlé all-in-one audio and video conferencing bars deliver premium AV experiences for small and medium conference rooms.
- **Vidi**: Our line of conferencing cameras enable extraordinary video meetings in huddle spaces and small to medium sized conference rooms.
- **Apprimo**: Offering enhanced flexibility in room control and nearly unlimited options in UI design, the Apprimo line of touch interfaces makes it simple to configure, operate, and manage AV equipment in complex spaces.
- **Impera**: Comprised of control pads, switching relays, and touch panel controllers, the Impera product family enables powerful room control.
- **Desono:** Tesira offers end-to-end solutions for both conferencing and sound reinforcement with our Desono family of business audio loudspeakers, available in multiple styles.
- **Community:** Our family of performance loudspeakers targets demanding indoor and outdoor applications including commercial, leisure, stadiums, and other large venues.
- **Vocia:** A multi-purpose public address, voice evacuation, and background music system, the Vocia platform provides users with unprecedented scalability and flexibility.
- **Cambridge:** Our line of sound masking solutions protect speech privacy, reduce noise distractions, and increase workplace productivity.
- **Evoko:** Room and desk scheduling systems that make it easy to reserve workspaces without double-bookings or interrupted meetings.
- **Voltera:** With the perfect combination of power and simplicity, Voltera A series amplifiers and Voltera D series amplified loudspeaker controllers are ideal solutions for a wide variety of spaces.
