

T20IP

waterproof 8 ohms, 70 / 100
volt transformer, 20 watts

The T20IP is a small built-in 70 / 100 volt line transformer, designed to make it possible to convert a standard 8 ohms loudspeaker into a 100 volt line speaker with selectable power taps: 2.5 – 5 – 10 and 20 watts in 100 volt and 1.25 – 2.5 – 5 – 10– 20 watts in 70 volt.

This transformer will open a lot of additional speaker models to the 100 volt speaker range. The only thing that needs to be done is to connect the T20IP transformer between the 70 or 100 volt amplifier and the low impedance loudspeaker.

Another great advantage of the T20IP is that it's packed inside a humidity resistant box.

The waterproof marine loudspeakers, the CMART Series, are already equipped with this 20 watts transformer what makes this waterproof series suited for low impedance as well as 70 or 100 volt systems.

TECHNICAL SPECIFICATIONS

height in mm	53	width in mm	112
depth in mm	58	100V power taps in watts	20 - 10 - 5 - 2.5
input in ohms	8	70V power taps in watts	20 - 10 - 5 - 2.5 - 1.25
Net weight product (kg)	0.53 (1.2 lbs)	output in volt	70/100
