WHAT WE DO

Biamp® is a leading provider of innovative, networked media solutions that connect people through extraordinary audiovisual experiences. For more than 45 years, we've developed professional AV solutions that enable great communication for spaces ranging from small rooms to large public venues. The company is recognized worldwide for delivering high quality products and backing them with a commitment to exceptional customer service.

SOLUTION OFFERINGS

Conferencing

Biamp conferencing solutions enable extraordinary communication with unparalleled ease of management, providing seamless audiovisual experiences for meeting spaces of all sizes.

Installed Sound

Every space has its own unique acoustic needs, which is why we provide a wide range of solutions, including loudspeakers and amplifiers, to serve conference rooms, stadiums, retail spaces, and all venue types in between.

Control

Biamp control solutions provide the right interface for all integrated AV hardware. We deliver easily configurable control products that offer simple, reliable connections for every meeting, lecture, and presentation.

Sound Reinforcement

Our sound reinforcement systems offer audio distribution and voice amplification for clear communication in larger spaces, such as classrooms, auditoriums, and multi-purpose rooms.

Networked Video Distribution

Our video encoders and decoders support real-time video distribution over the network, with patented, automated lip sync management, low latency transmissions, and exceptional image quality.

Networked Paging and Voice Evacuation

Our paging platform is a highly reliable solution that manages paging, background music, and emergency communication. Powerful, scalable, and flexible, it can meet the needs of any facility now and well into the future.

Sound Masking and Speech Privacy

Our sound masking products eliminate noise distractions and help improve speech privacy, significant issues that directly affect employees' job satisfaction and productivity.

Audience Engagement

Our unique audience engagement platform allows audiences and presenters to interact seamlessly. By immersing the audience in discussions, you can create more dynamic, memorable, and fun experiences.

Room & Desk Booking

Evoko room and desk scheduling systems take workplace management to a new level of simplicity.

OUR PRODUCT FAMILIES

- **Tesira:** Our flagship platform, Tesira is the world's premier integrated, networked audio and video processing and distribution platform.
- **Devio:** Designed with huddle rooms in mind, Devio is a collaboration tool that brings Biamp's full conference room audio and video to smaller spaces.
- **Parlé:** Our family of dynamic Beamtracking microphones deliver superior audio experiences via 360° voice tracking that enables complete room coverage. Parlé all-in-one audio and video conferencing bars deliver premium AV experiences for small and medium conference rooms.
- **Vidi:** Our line of conferencing cameras enable extraordinary video meetings in huddle spaces and small to medium sized conference rooms.
- **Modena:** Wirelessly connect, control, and share content with Modena. Enabling video conferencing and presentation capabilities, Modena supports BYOM meetings anywhere.
- **Apprimo:** Offering enhanced flexibility in room control and nearly unlimited options in UI design, the Apprimo line of touch interfaces makes it simple to configure, operate, and manage AV equipment in complex spaces.
- **Impera:** Comprised of control pads, switching relays, and touch panel controllers, the Impera product family enables powerful room control.
- **Desono:** Tesira offers end-to-end solutions for both conferencing and sound reinforcement with our Desono family of business audio loudspeakers, available in multiple styles.
- **Community:** Our family of performance loudspeakers targets demanding indoor and outdoor applications including commercial, leisure, stadiums, and other large venues.
- **Crowd Mics:** Turn every smartphone into a wireless microphone. Real-time polling and text features make events more memorable and engaging.
- **Vocia:** A multi-purpose public address, voice evacuation, and background music system, the Vocia platform provides users with unprecedented scalability and flexibility.
- **Cambridge:** Our line of sound masking solutions protect speech privacy, reduce noise distractions, and increase workplace productivity.
- **Evoko:** Room and desk scheduling systems that make it easy to reserve workspaces without double-bookings or interrupted meetings.
- **Voltera:** With the perfect combination of power and simplicity, Voltera A series amplifiers and Voltera D series amplified loudspeaker controllers are ideal solutions for a wide variety of spaces.
