

GENERAL DESCRIPTION

The **DSSB-4** Bridge Mount provides a rust resistant steel, load bearing support for mounting the DS1390 or DS1398 low profile sound masking and paging speaker in in a drop-tile ceiling grid. Easy "mark & cut" "square" hole design for fast and efficient installation. Multiple seismic tie-off points are provided. Tinnerman clips provide easy screw threading, quick mount tabs hold the back box in place without screws, and locating tabs provide secure mounting positions in ceiling tiles. Install parallel to the floor plane in a suspended structure; maximum of 24" in one direction.
